VAUGHAN'S RADISH SEED.

THROUGH our large trade with market gardeners and florists of the West, we have met with a large demand for this vegetable, and in consequence have kept the largest variety of any seedsman in the country, as our catalogues for the past five years will show. The result has been that we have obtained a sale of our Radish Seed to gardeners in nearly every large city in the Union. We deem the following (three being entirely new) worthy of special mention:

EXTRA EARLY FORCING RADISHES.

STRICTLY new, secured by us in Europe the past season; are worthy the attention of every Market Gardener. In earliness these varieties surpass our Very Early Olives shaped Deep Scarlet Short Top. They are admirably adapted for cultivation under glass, on account of the small size of their foliage. The upper one shown in the engraving is rather flat and of a carmine rose color, the two others are globular in shape; the white tip of the second is sharply delineated and gives a fine appearance to the bunches ready for marketing. The bright color and elegant shape of the third makes it very salable. Prices:

EXTRA EARLY CARMINIE TURNIP, oz. 20c.; lb. 40c.;
EXTRA EARLY SCARLET GLOBE WHITE TIP,
EXTRA EARLY BRIGHT SCARLET,

RADISH—Scarlet Turnip, White Tip, Select Stock.

A VERY fine strain of this well known kind, even in size, smooth and of a fine bright scarlet color.
Per pkt., 5c.; oz. 15c.; lb. 35c.; lb. $1.25.

RADISH—SURPRISE.

A NEW Spanish variety, medium in size, oval in shape and of a light brown color. Of very early, quick growth. It is remarkable for remaining longer in fine condition without becoming pithy than any other very early sort. It has also the same fine quality when sown in the middle of the summer.
Per pkt., 5c.; oz. 15c.; lb. 35c.; lb. $1.50.

RADISH—NON PLUS ULTRA.

THIS is a turnip sort of German origin; of fine round form, bright scarlet color, of tender flesh and delicate flavor, its remarkably quick growth and very short top render it specially valuable for forcing. Sent out by us first last year, it has given the greatest of satisfaction to our customers. We have secured the best stock of this new sort in the market and those who get it from us will not be disappointed.
Per pkt., 5c.; oz. 15c.; lb. 35c.; lb. $1.25.

RADISH—EARLIEST OLIVE, DEEP SCARLET SHORT TOP.

A NEW and very distinct type of the well-known olive shaped radish which is of perfect form, smooth skin, fine color, and with very short leaves. This, combined with its extremely quick growth, taking only three weeks to mature, renders it extraordinarily valuable for forcing, while it does equally well in the ground. The flesh is pure white, crisp and of very pleasant taste. A great favorite with gardeners at Chicago.
Per pkt., 5c.; oz. 10c.; lb. 30c.; lb. $1.00.

RADISH—SCARLET GLOBE.

NOT a new, but most desirable turnip sort for hot-bed forcing; very early and in flavor mild, crisp, juicy and tender. Top small and will stand the heat well without becoming pithy. Good for garden as well as forcing.
Per pkt., 5c.; oz. 10c.; lb. 30c.; lb. $1.00.

WHITE BARLETTA ONION.

INTRODUCED by us last season, it has proved all we claimed for it, which was as follows: this variety is most distinct on account of its great earliness; it is three weeks in advance of the White Queen. It is of a beautiful waxy white color and grows 1½ inches in diameter and 1½ of an inch thick, with finely formed bulbs, slightly flattened at the top. Its earliness will highly recommend its use as a substitute for Onion sets and it is without a rival for pickles.
Per pkt., 10c.; oz. 25c.; lb. 75c.; lb. $2.00.

WHITE BARLETTA.
CAULIFLOWER, EARLIEST DWARF ERFURT.

This is the most delicious and handsome Tomato ever introduced, having an appreciating fruity flavor not met with in any other. The fruit is uniform size, and resembles a peach in shape, size and color, which is a deep rose and orange amber beautifully blended and covered with a delicate bloom or furze-like a peach. It is without a rival for eating from the hand, the flesh being of a rich and most delicious flavor. The skin is very thin and can be peeled off like that of a peach. The entire fruit tender and free from core, even around the stem and taken in all this is a vegetable which should have a place in every garden. Per pkt, 10c.; $ for 25c.; ½ lb., 25c.; 1 lb., 75c.

NEW SQUASH—SUMMER CROOKNECK.

This is an old staple article of the Seedsman’s stock, and though we do not claim our seed to be the “BEST IN THE WORLD,” yet it is as pure as we have seen and the product is as near to what the squashes should be as one can grow. Per pkt, 5c.; oz., 10c.; ½ lb., 20c.; 1 lb., 50c.

CAULIFLOWER, EARLIEST DWARF ERFURT.

New Dwarf Champion Tomato.

We have secured at a high price, some seed of an extra large strain of the above well-known kind,—that has been carefully selected by a reliable Market Gardener for a number of years. A very select and profitable strain for market. Stock limited. Per pkt, 15c.; 5 for 50c.

PIKE’S PEAK OR SIBLEY SQUASH.

The form is new, having the stem at the swelled end. The seed alone, being of very peculiar shape and color, brands the Squash as original and distinct. The shell is pale green in color, very hard and flinty, being at the same time so very thin and smooth, as to occasion the least possible waste in killing. The flesh is solid, thick, a vivid brilliant orange in color, and is possessed of rare edible qualities, being dry, and really wonderful for fineness of grain and the rich and delicate flavor peculiarly its own. The weight ranges from eight to eleven pounds. It ripens with the Hubbard, and is more prolific, a long keeper and a good shipper. Price, pkt, 5c.; oz., 15c.; ½ lb., 50c.; 1 lb., $1.05.

Greenvale, Ill., Aug. 3, ’89.—Your Dwarf Champion Tomato has proved all that was claimed for it in the following particulars. As early as any good Tomato; it has ripened fruit earlier than any other variety, perfect in form and color, satisfactory size, habit of plant compact and bushy. Planted a foot by 20 inches gave room to pass through without touching a vine. S. F. Minor.
